Hi there!
Please use this link to download my mobile app:
mls-client.com/F00D82CE
Contact me if you need help!
Regards,
Carrie Graw

The installation link lets your clients download your app from the App Store or Google Play Store. It'll appear on their phone as "MLS-Client".

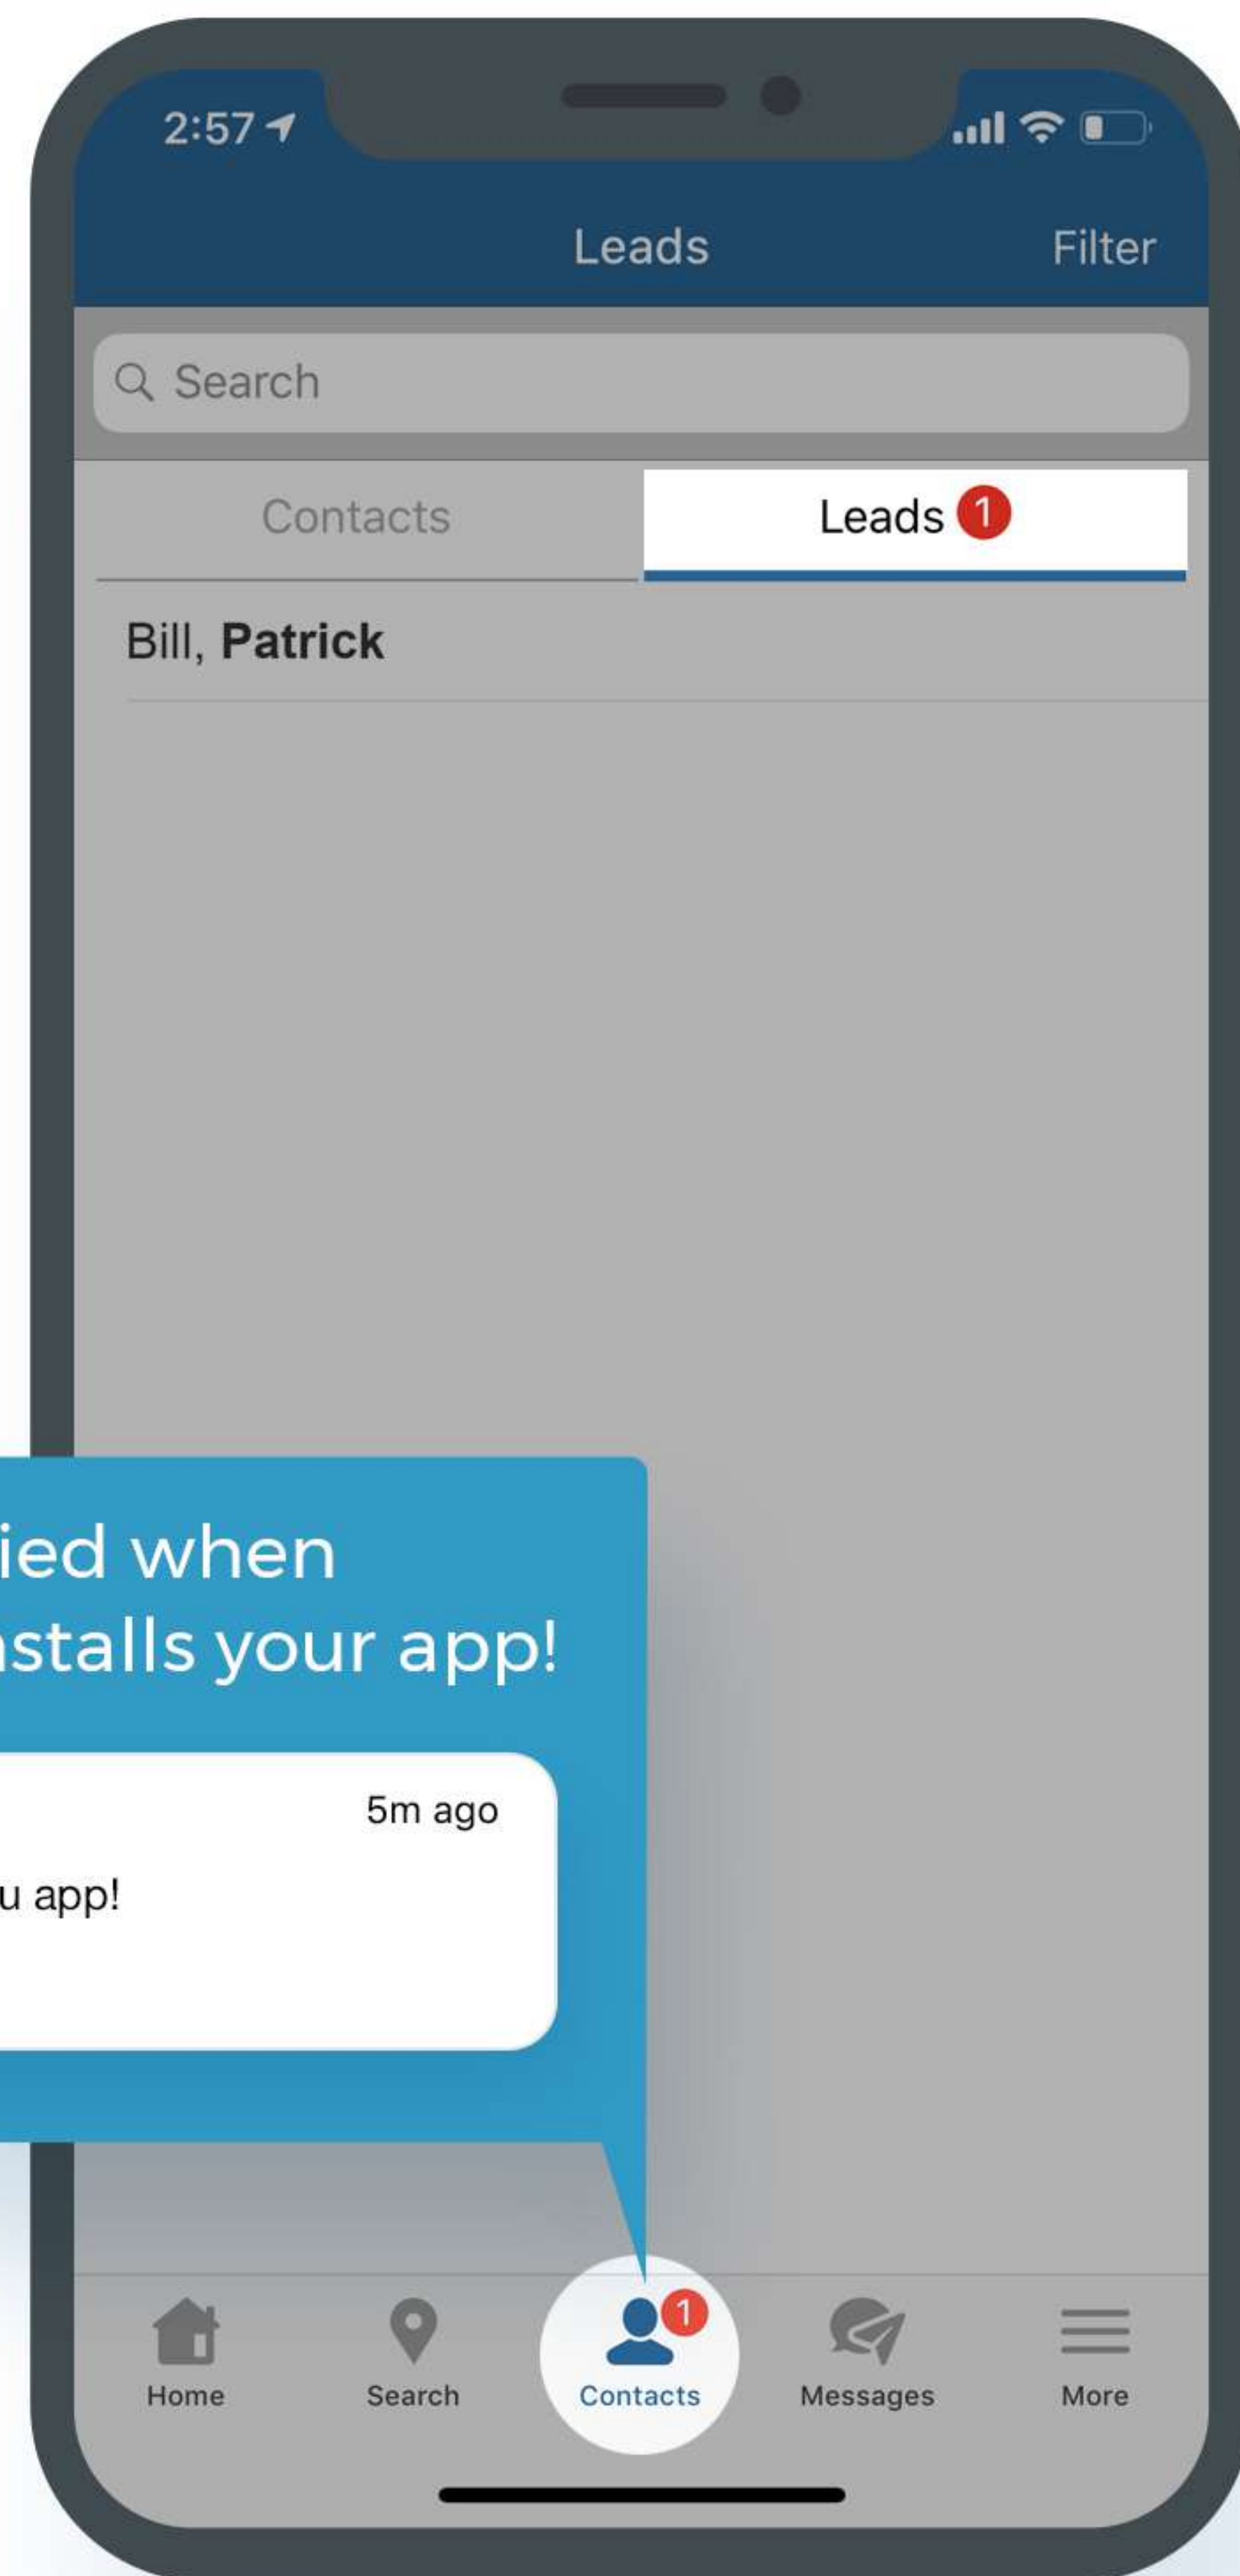

Press and hold to copy link and add it to your website, email signature or social media accounts.

Share your app by Email or Text Message

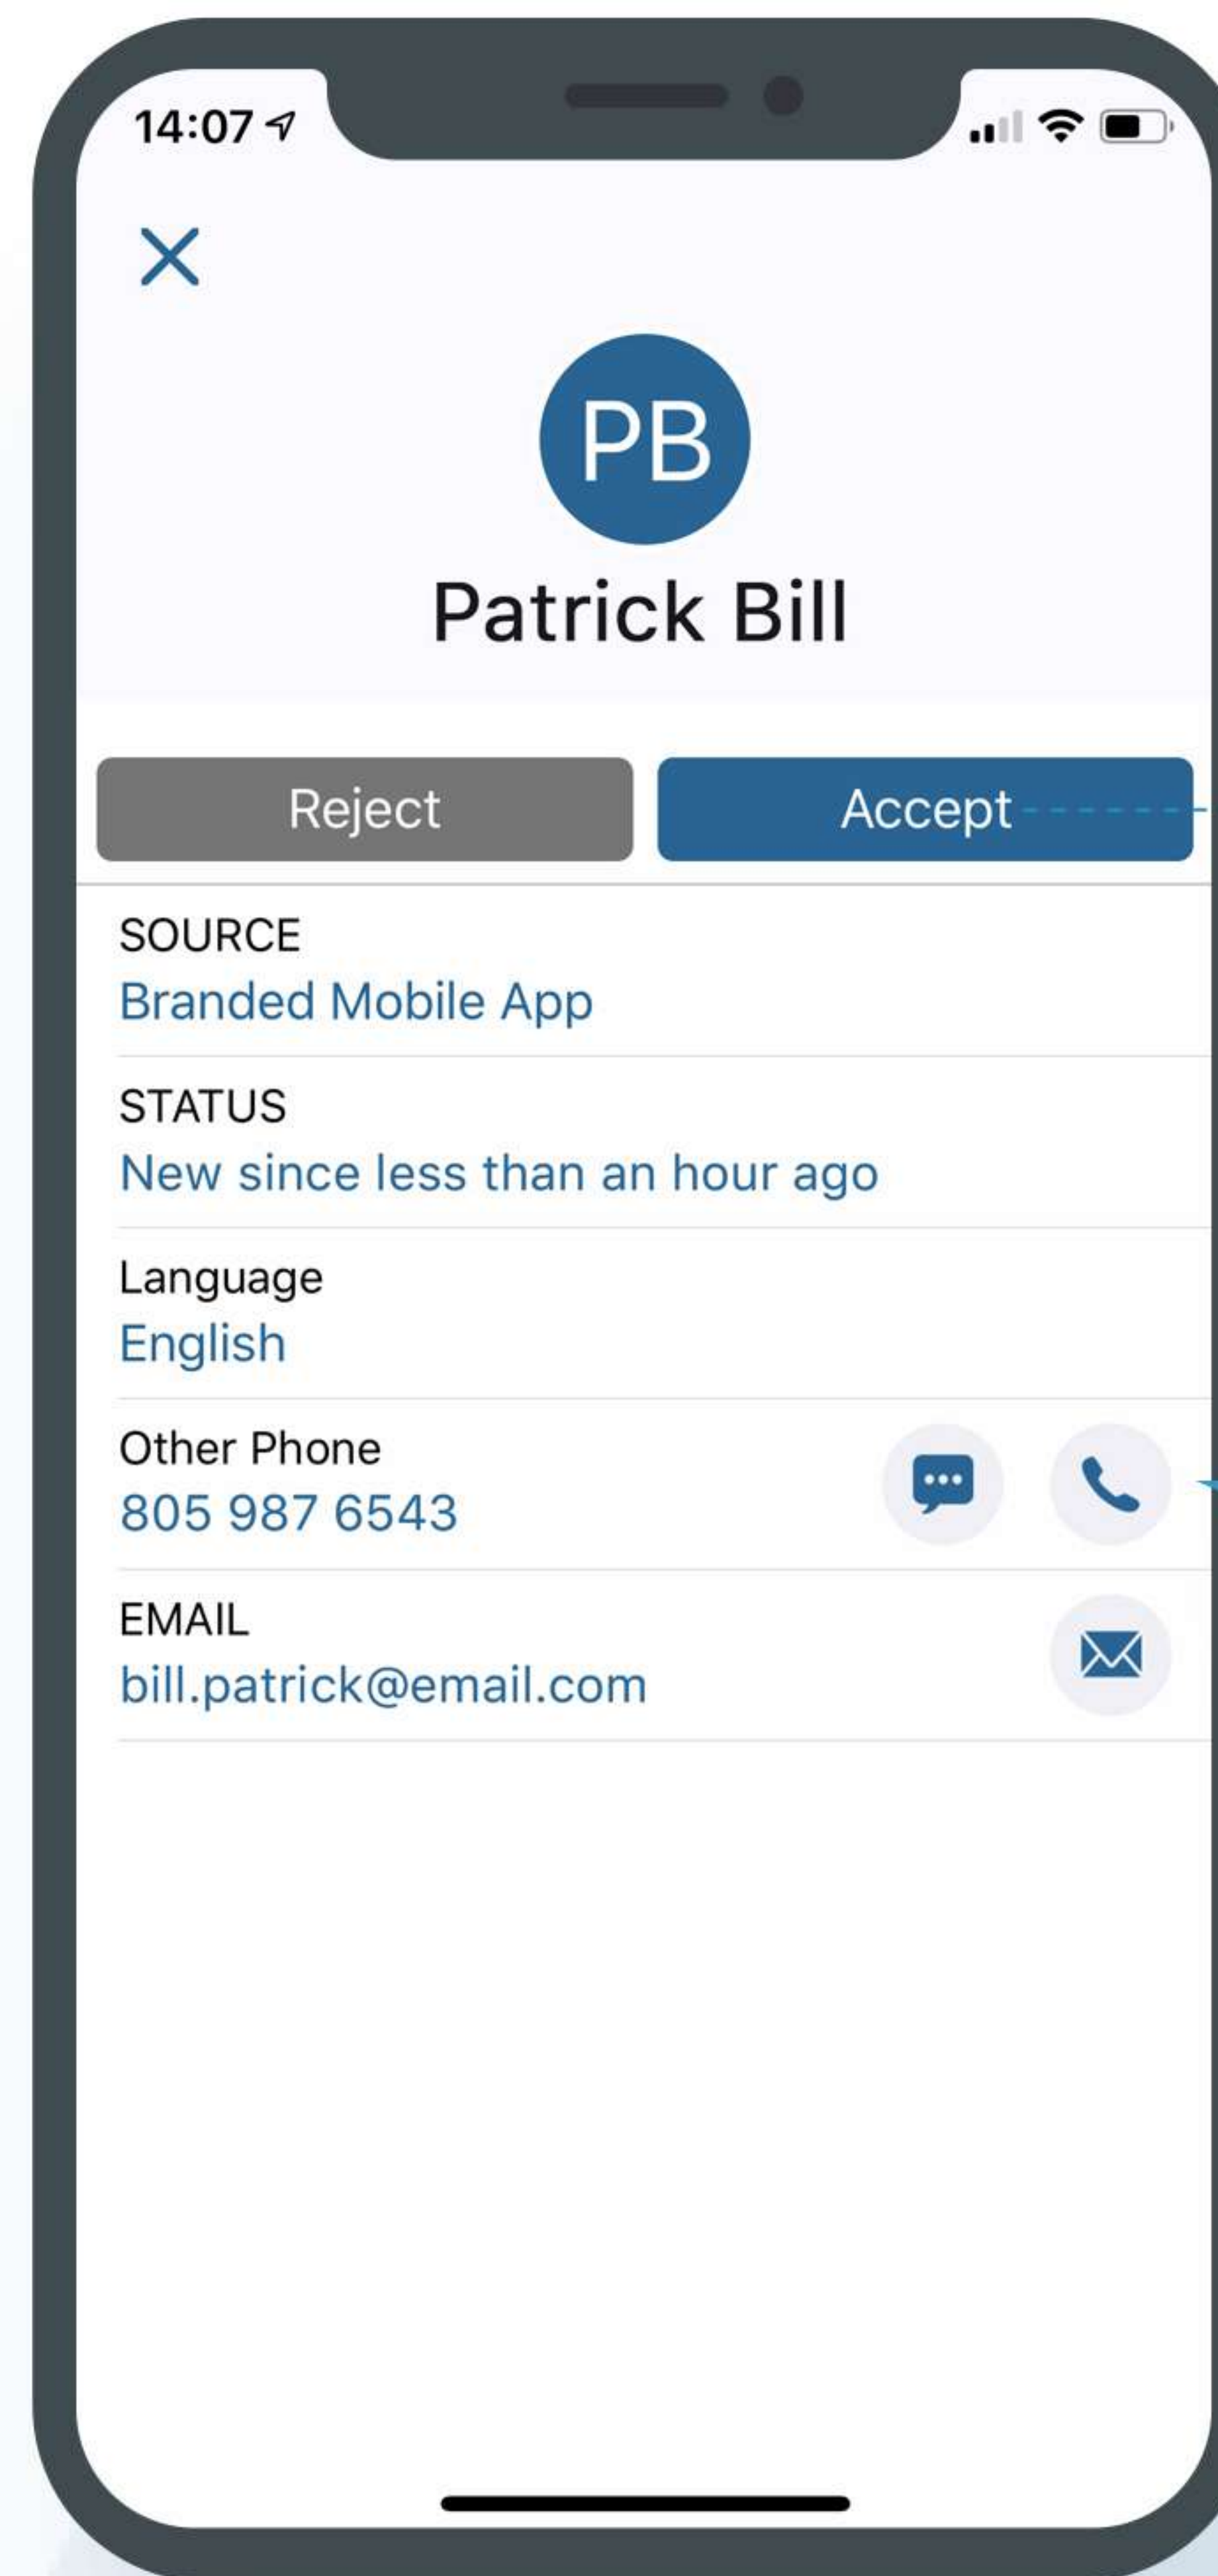

See Who's Downloaded Your App

When clients install your app they'll appear as a Lead in your Contact Manager. Accept the leads to add them to your Contacts and you're ready to start collaborating and tracking their Favorites.

You will be notified when someone new installs your app!

Don't know this new lead?
Contact them to get acquainted!

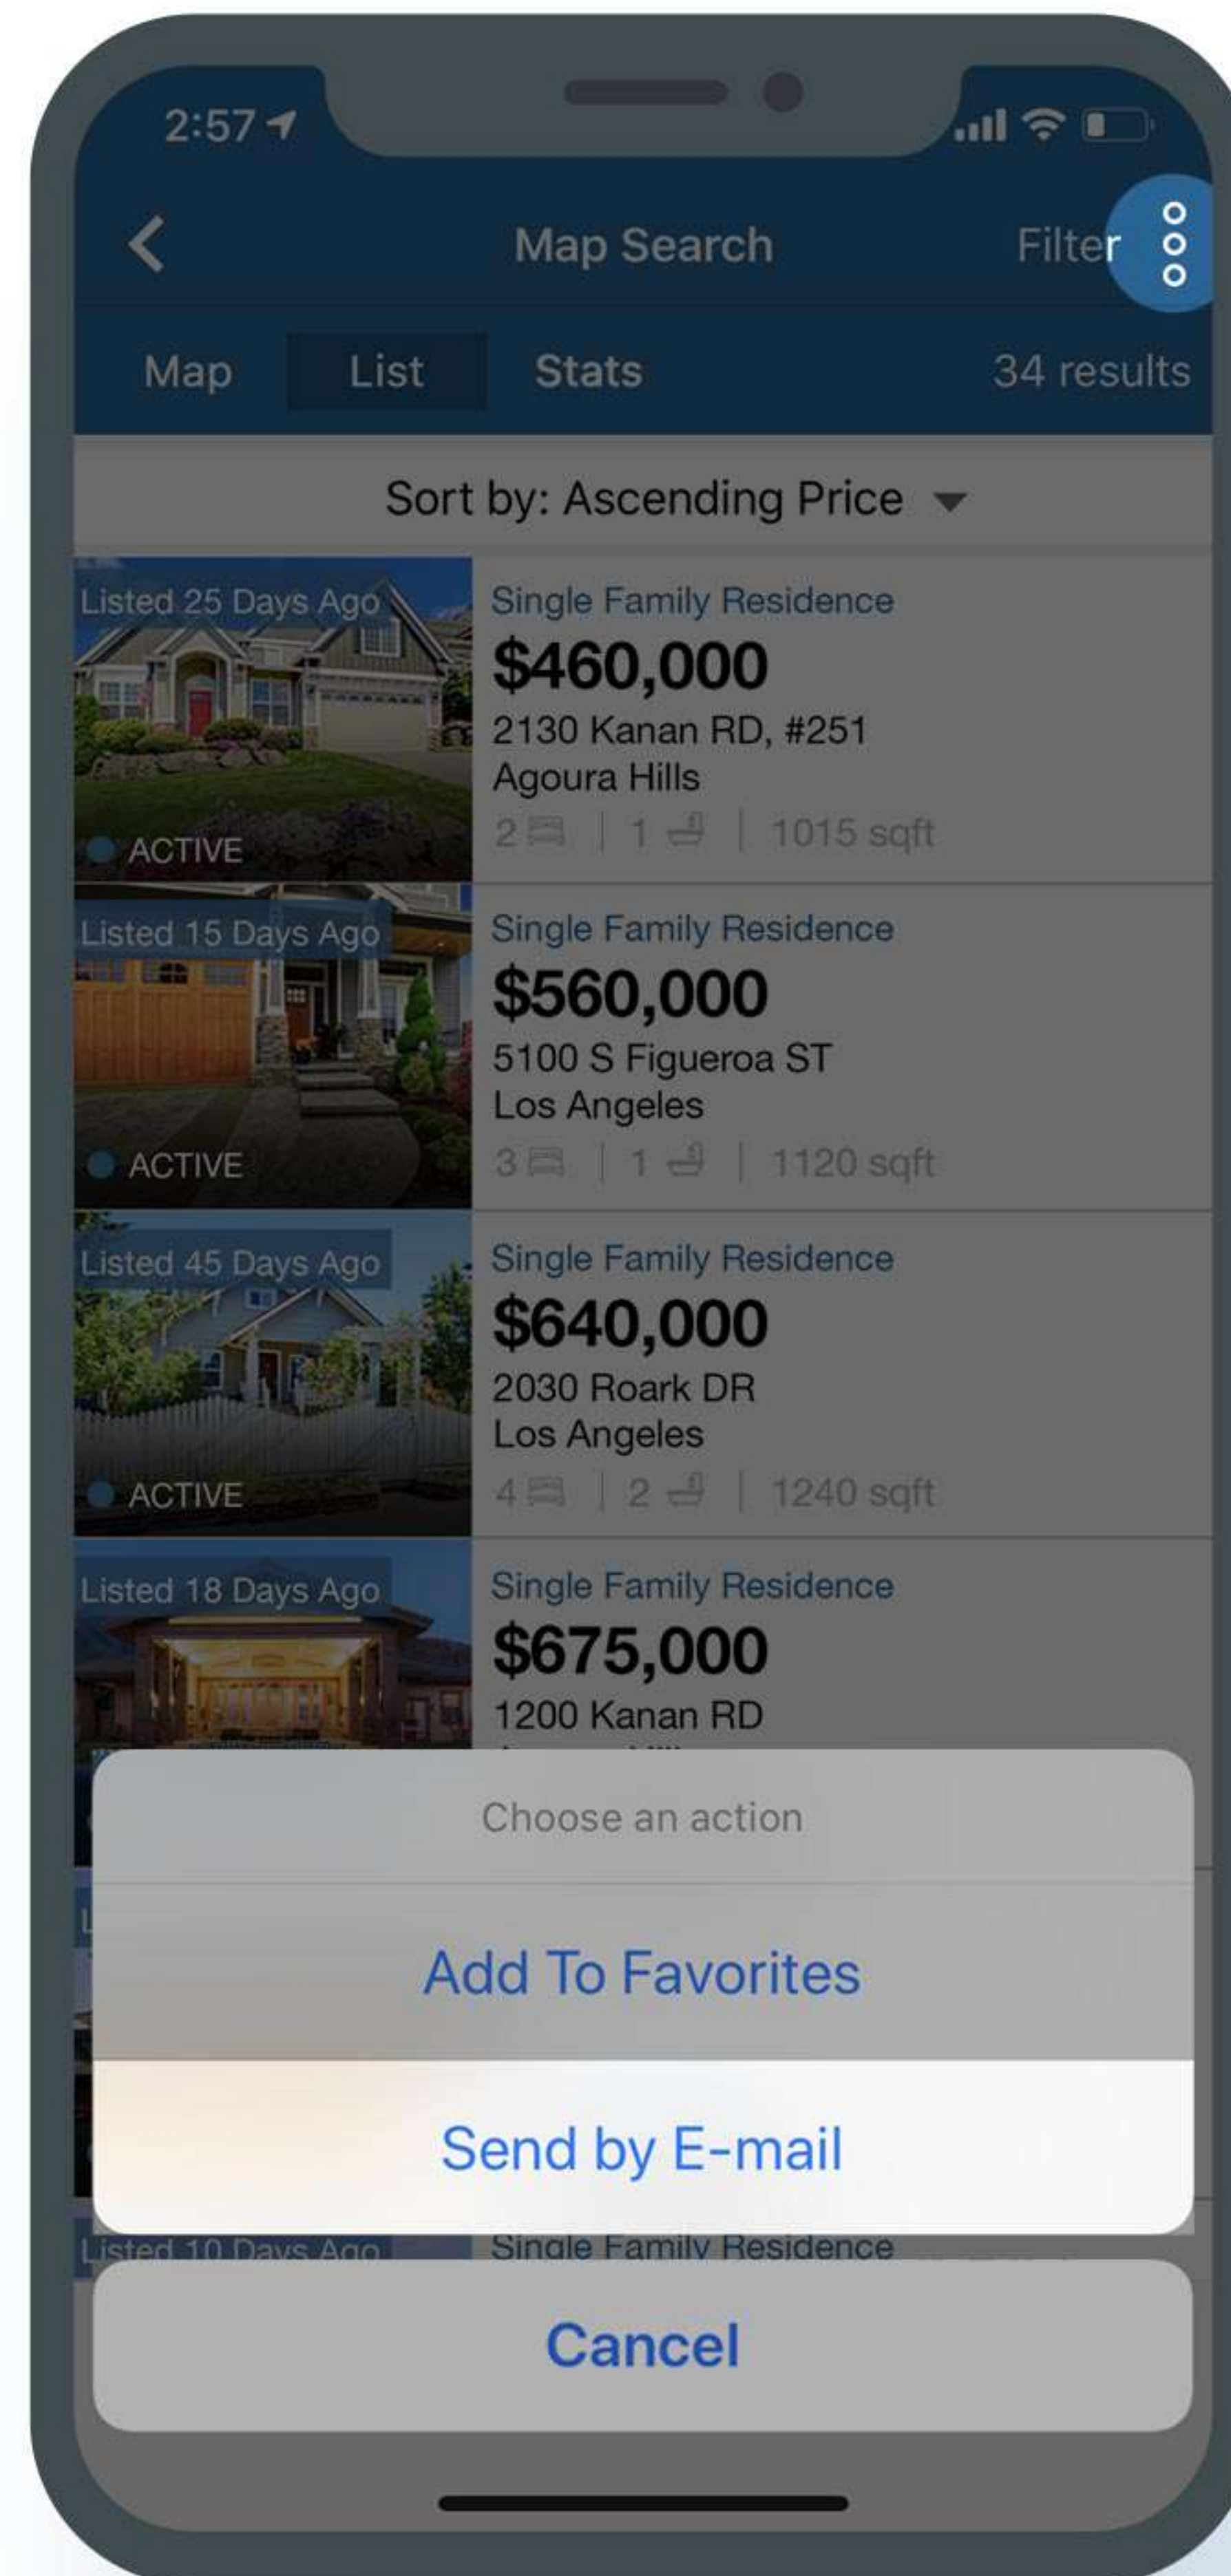

Suggest Listings To Your Clients

Send listings to your clients by Email or Text Message. They'll be able to review them from within your app.

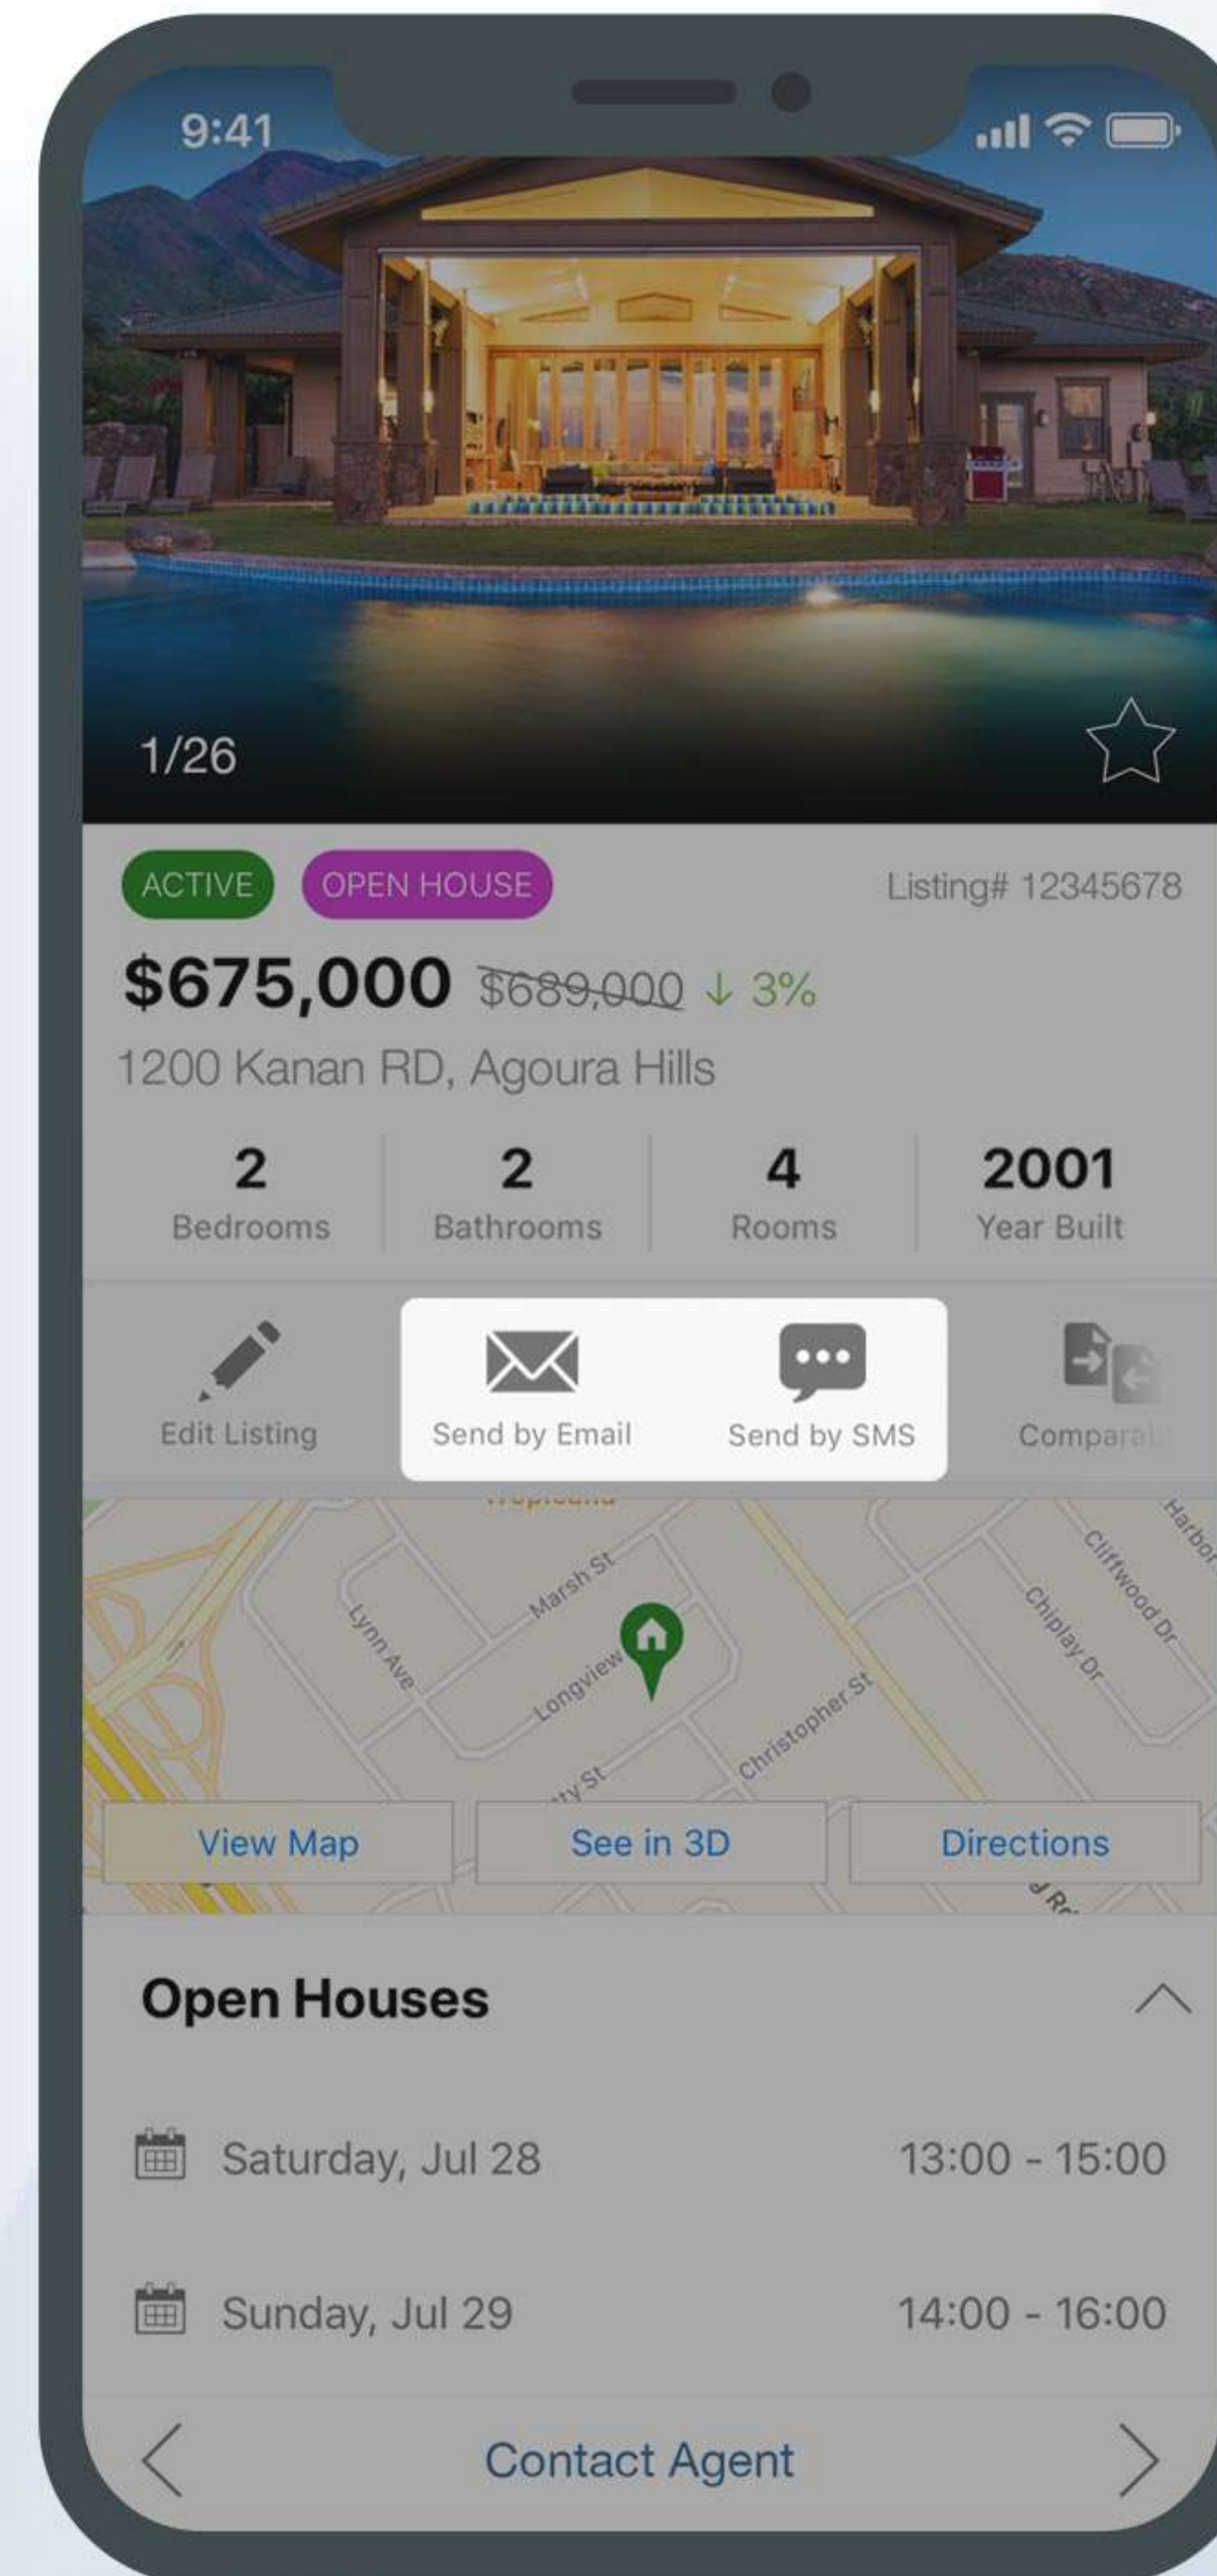

When sending listings, make sure your client's contact info is in your Contact Manager. It makes it quick and easy to send emails and texts, and it ensures the listing is pushed to the branded app and tracked in the client contact record under Sent Listings.

You can select your client's email by tapping the **+** button on the right side of the "Send To" field.

Easy In-App Collaboration

With the MLS-Touch In-App Messaging tool you can stay in touch with your clients easily and discuss properties of interest.

Send a message
on the fly

Attach listing
details to a message

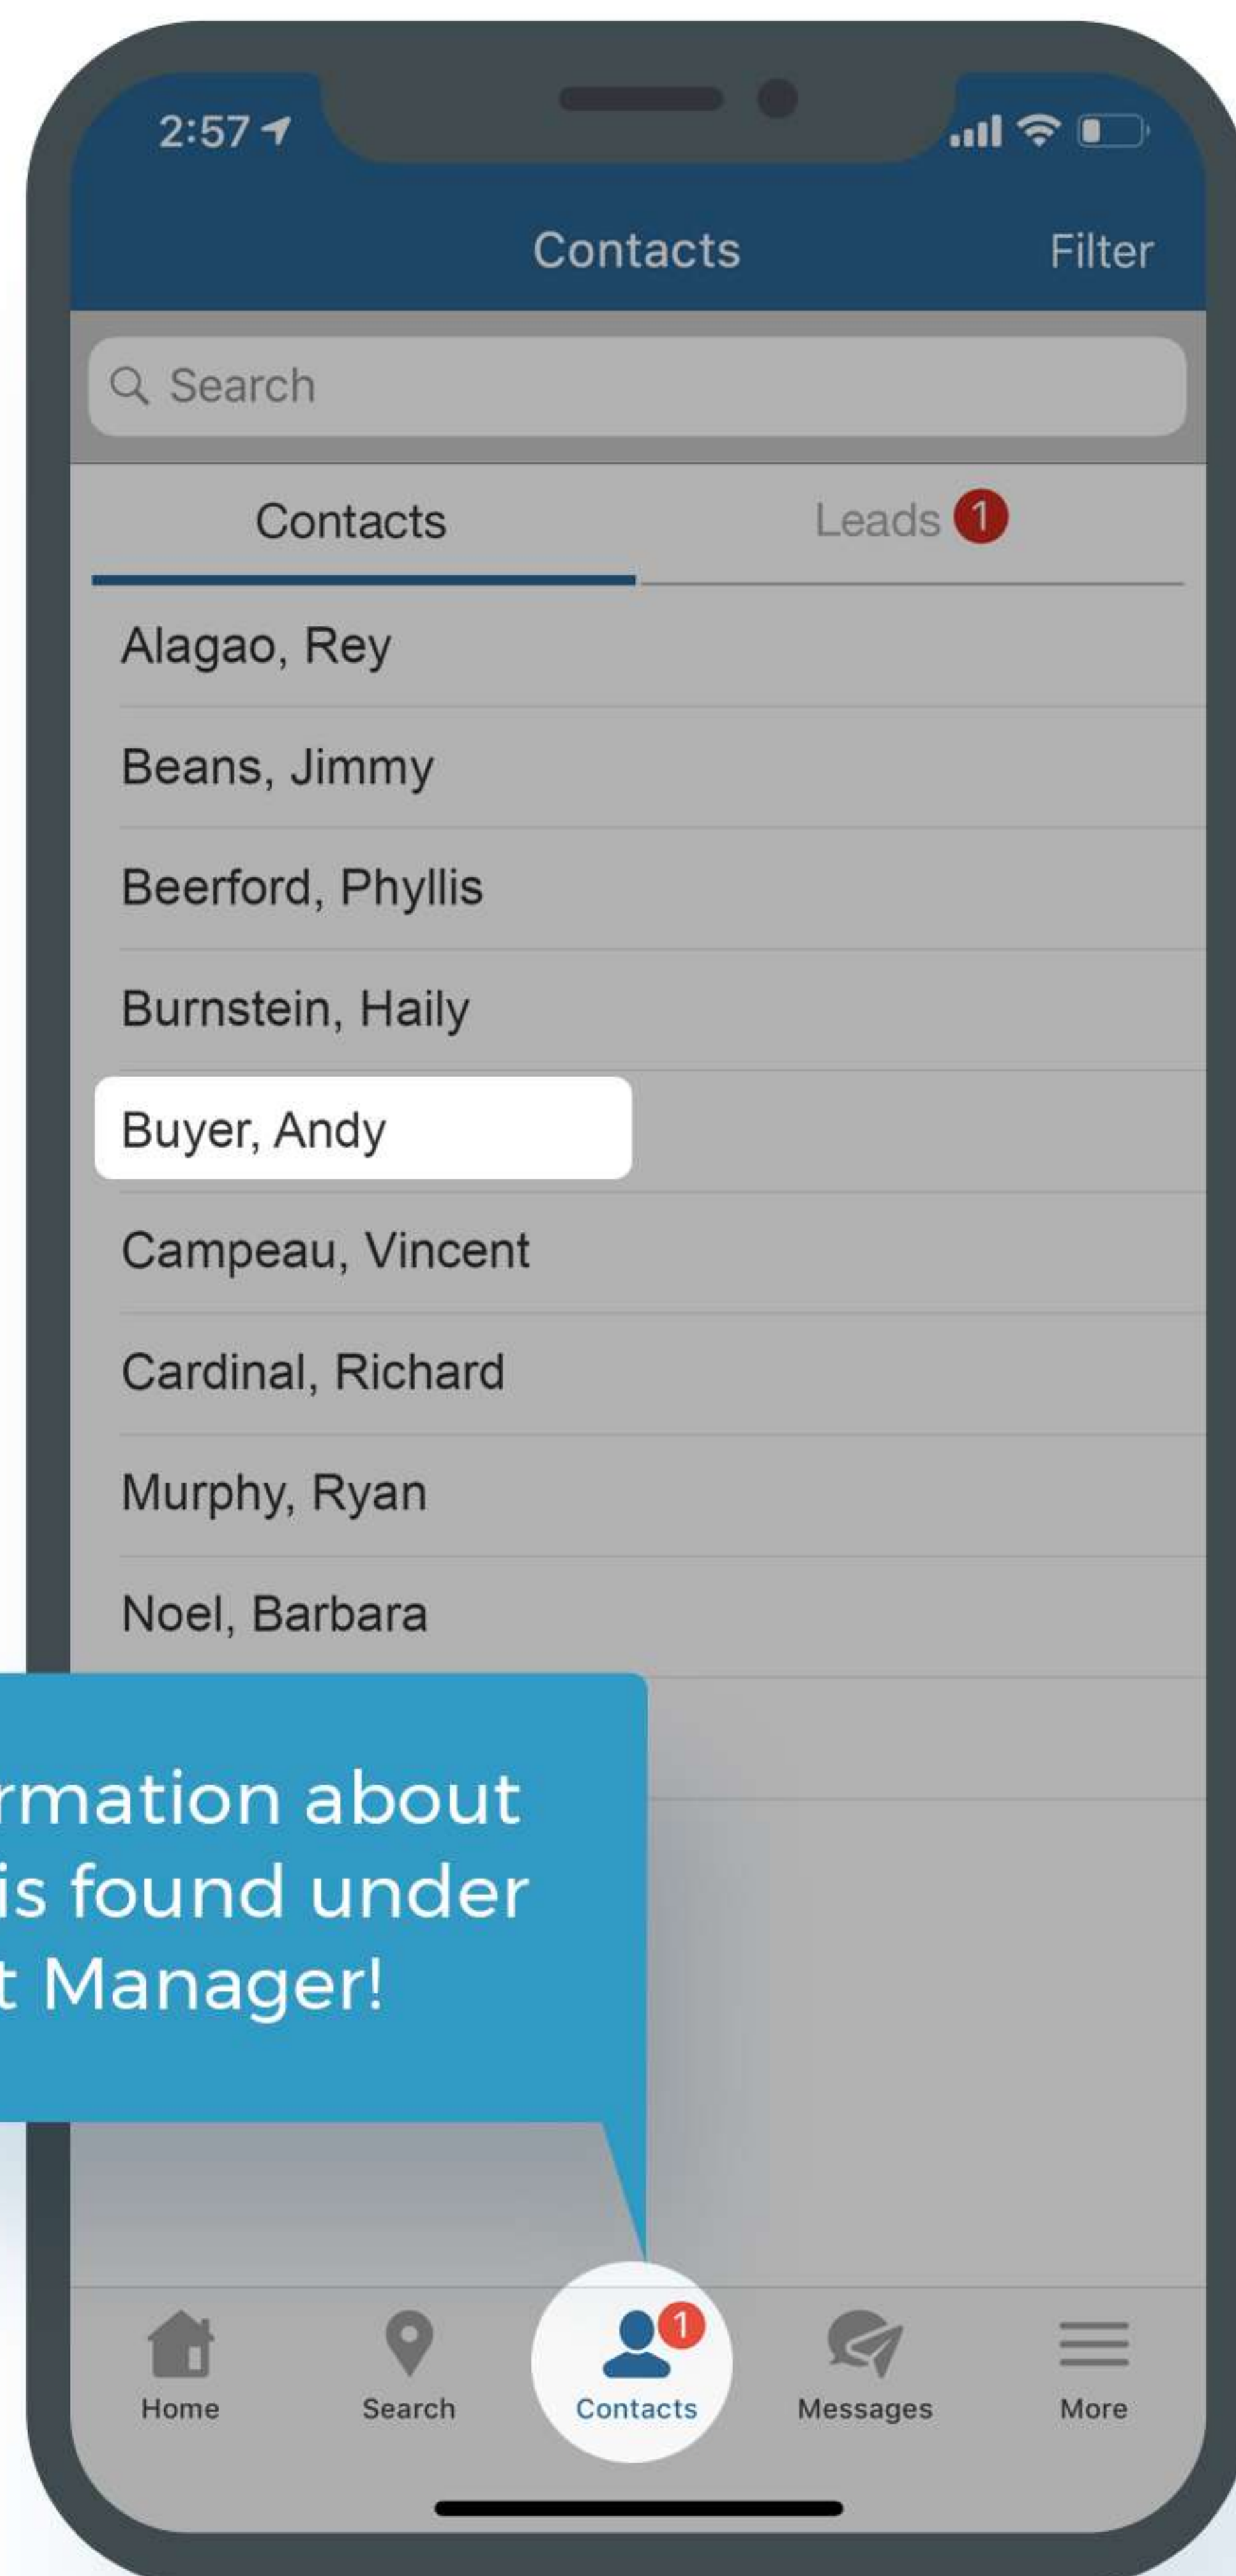

When you use the Messaging feature, the entire chat thread including any attached listing details will be tracked in the client record under Messages.

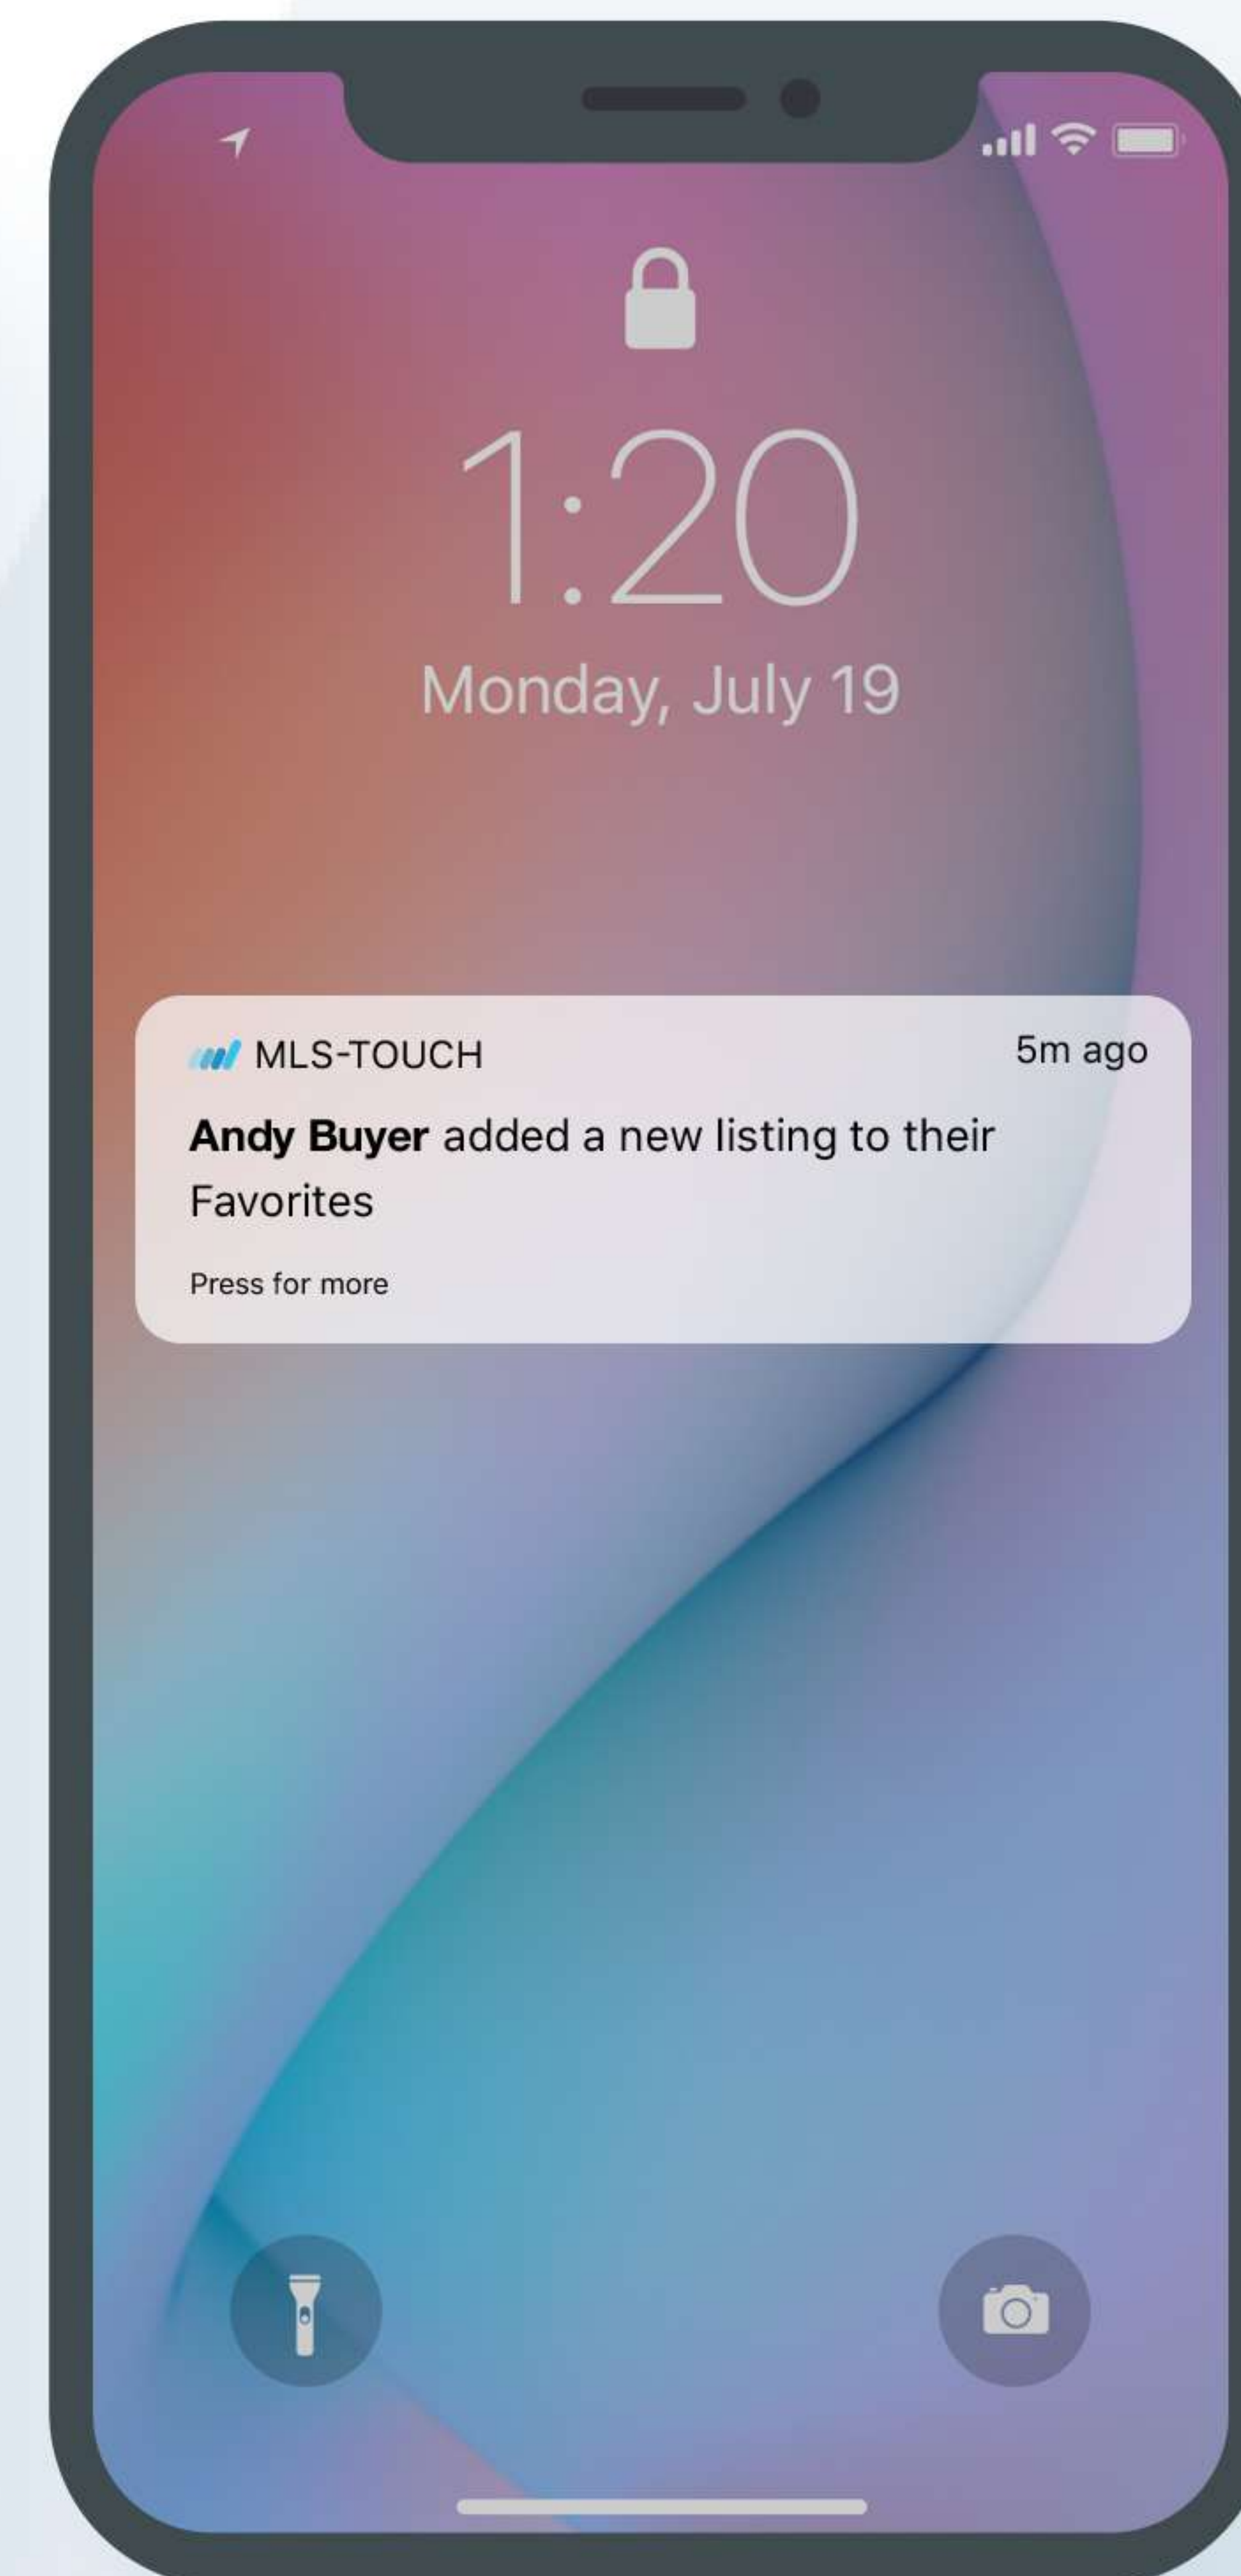

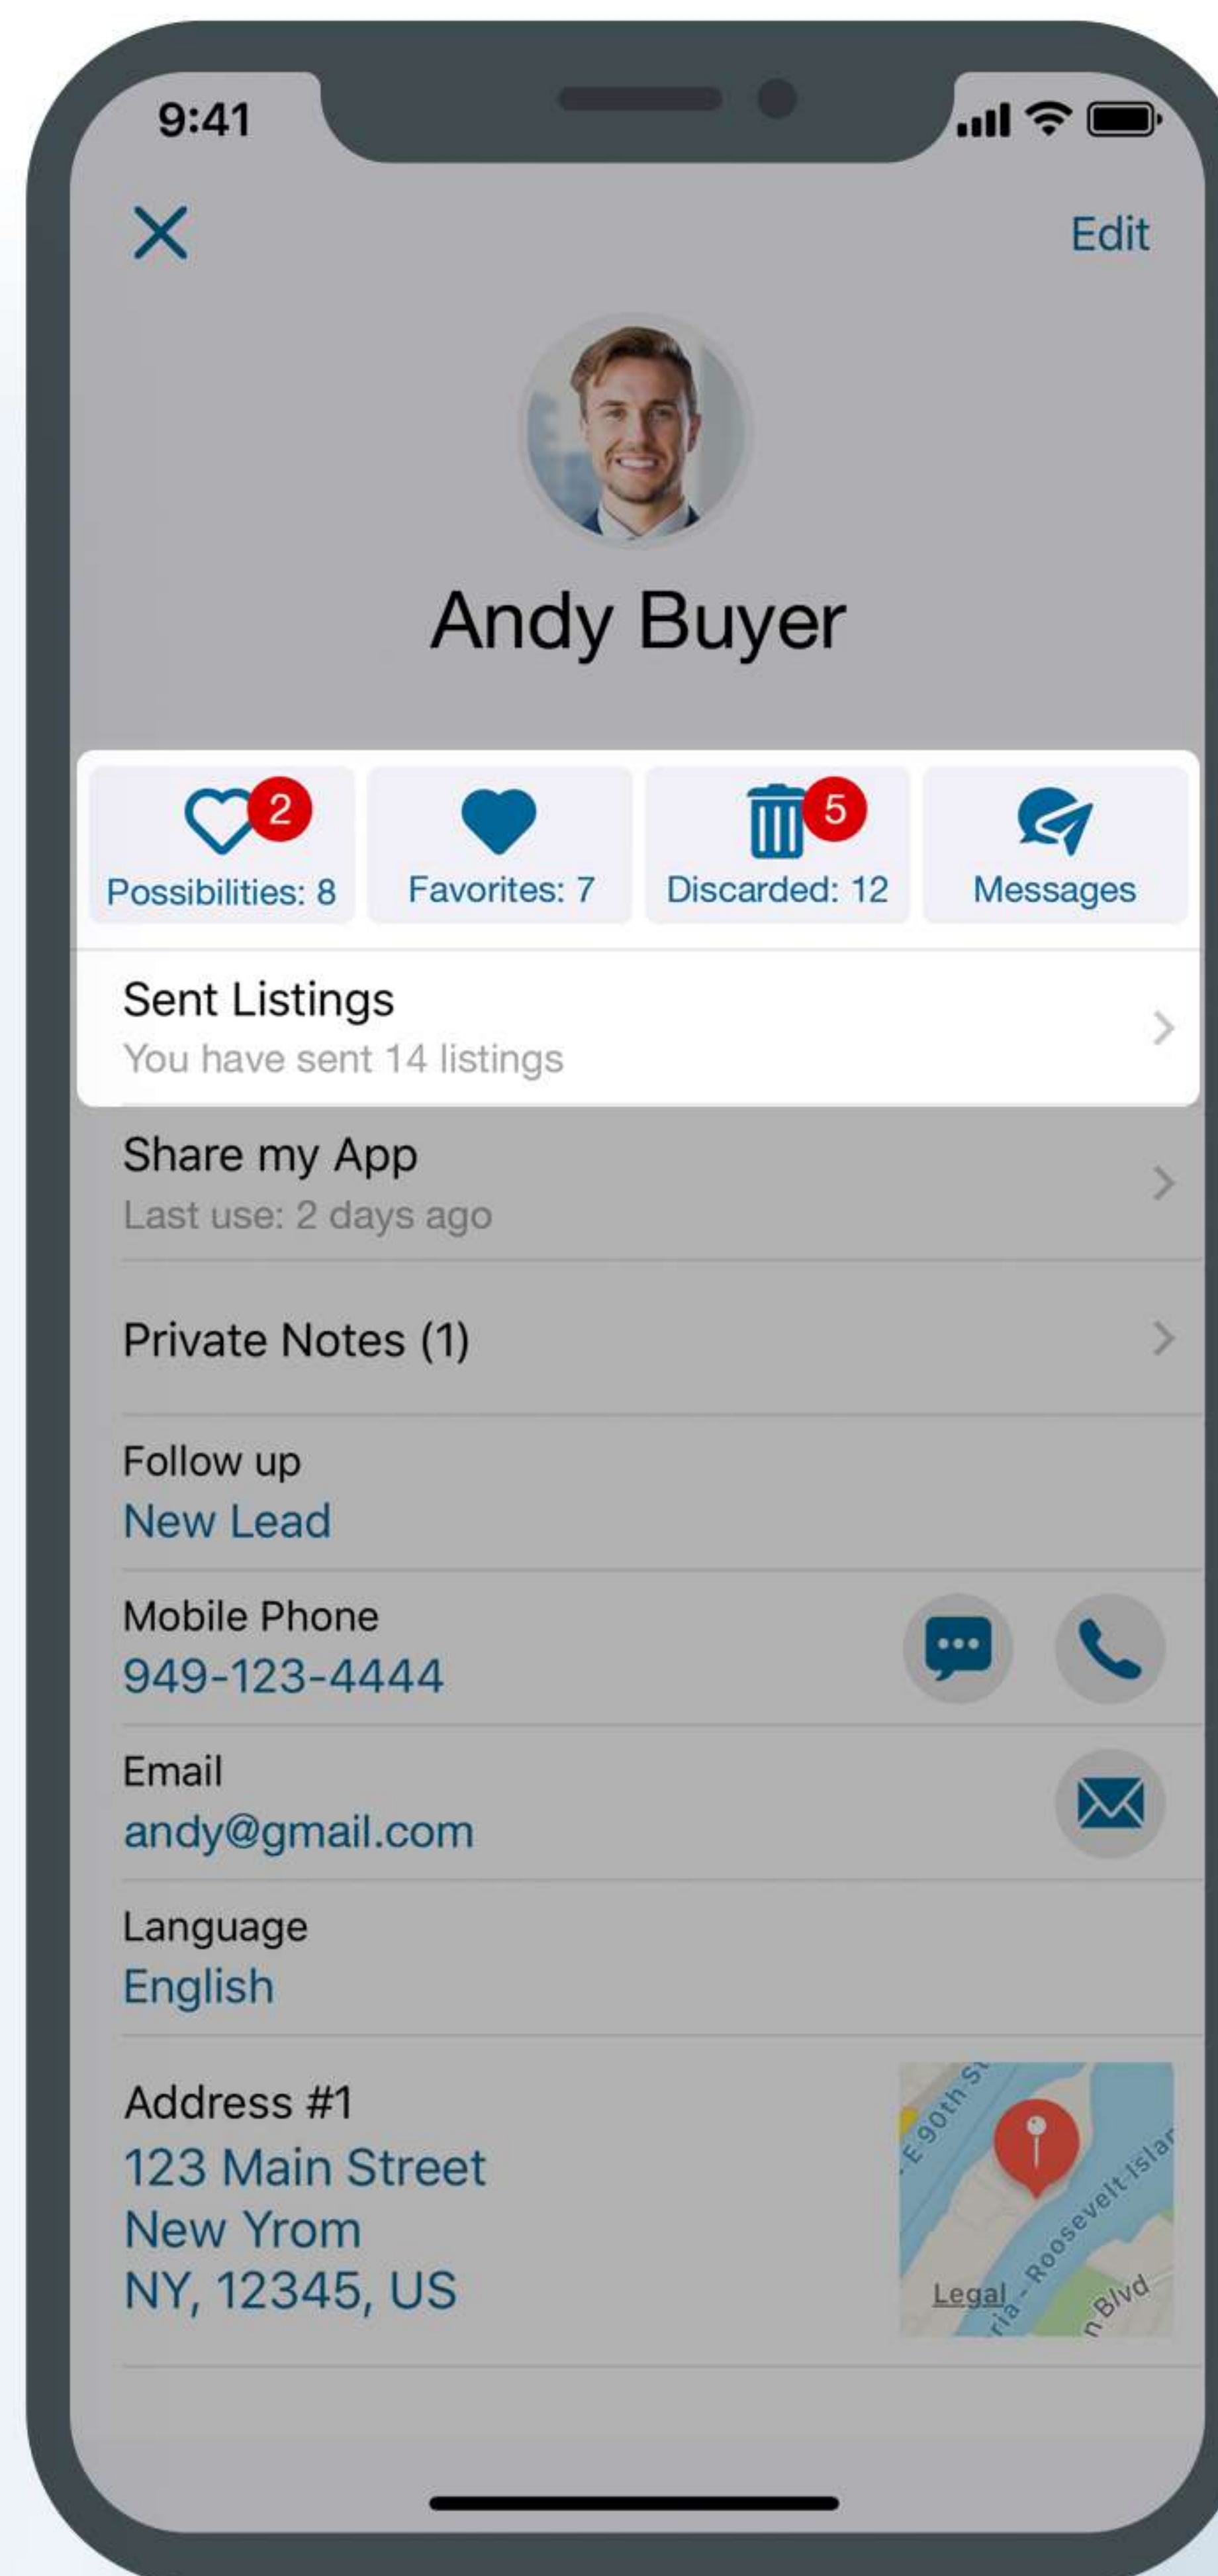

Easily Track All Client Activities

When your client flags a listing as a Favorite or Possibility, you'll be instantly notified. In addition, chat messages, flagged listings and suggested listings are tracked in real-time in your MLS-Touch Contact Manager, keeping client communications and activities organized in one place and easy to reference!

All the information about your client is found under the Contact Manager!
