# What's New in MLS-Touch | Prospects Mobile 4.0

Check out the newest update – version 4.0! MLS-Touch (Prospects Mobile in Canada) gives agents the tools they need to stay connected to critical listing data, tax data, and client activities while on the go. This must-have app for real estate professionals and their clients is now available to more than 1 million agents across 330 markets in North America! With V4.0, our most recent mobile update, we've refreshed and streamlined the user experience, resulting in a more vibrant interface and a smoother and more efficient workflow. Plus, we've included some bonus updates!

Let's take a look at the latest enhancements that version 4.0 has to offer:

## How to access the new 4.0 updates:

If your phone is set to auto-update your apps, then the latest MLS-Touch (Prospects Mobile) update will automatically download as soon as it is made available in the App Store / Google Play. Otherwise, simply go to the store and manually download the update.

## Sleeker Home Screen Experience / More Vibrant, Intuitive Interface

The app's classic "6 pack" home screen is now a new, more intuitive "7 pack" design with a vibrant new interface. The Map Search button, the most popular search, is larger and more prominent. InstaView and Hotsheet are also elevated on the home screen.

### SAY GOODBYE!

### SAY HELLOO ...

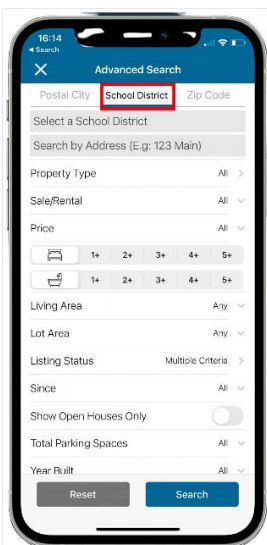

## Parcel Dimensions Now Available

For MLS markets in the US that have Realist available, MLS-Touch allows agents to Zoom in on their Map Search results to see parcel boundaries. Now, with the latest update, you can also see **parcel dimensions** for a more complete picture of the extended area of the property.

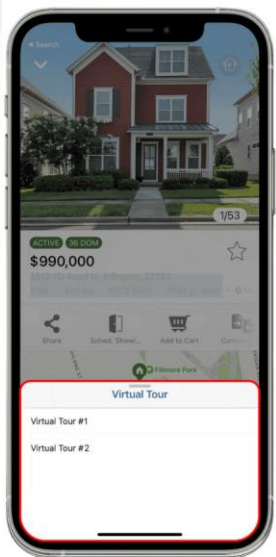

## Easier Location Searches

Using the Advanced Search feature, agents can now search all the lookup values of the second/third location tabs, eg: Subdivision, SchoolDistrict, Area, County, etc. Previously, you could only scroll through all the values, but now there is a search text box where keywords can be entered to easily filter the list for matches and select the desired location criteria.

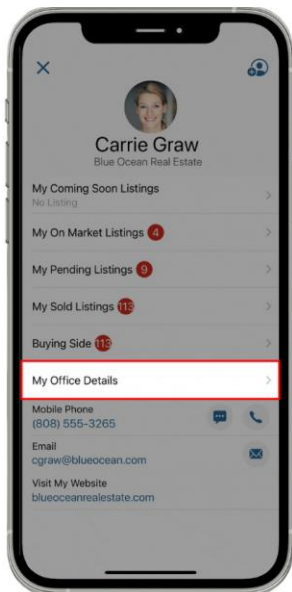

## Multiple View Tours

Some properties have more than one view tour. With the V4.0 update you'll be able to see *all* the View Tours available for the listing.

## View Office Information from Member Profiles

Under the More menu, using the “Find Members” option, agents can now view office information from the member’s profile. Select “My Office Details” to view office address, phone, and where available, a list of agents belonging to the office.

## Additional Changes & Bug Fixes in Version 4.0

ID	Function	Description
<b>MOB-6413</b>	Both Platforms	Enhanced the management of Listing Status "Active Under Contract".
<b>MOB-6742</b>	Both Platforms	Renamed "Cities" to "Locations" in the Hotsheet.
<b>MOB-7425</b>	Both Platforms	Refined event tracking for analytics using KMM, including third-party and client trackers.
<b>MOB-7400</b>	Both Platforms	Utilized new scanning tools for enhanced security and stability.
<b>MOB-6029</b>	Both Platforms	Introduced new Realist Field - "Local_Tax_Rate".
<b>Multiple Tickets</b>	Both Platforms	Refactored business logic and UI for general navigation, for ViewTours, schools on map, Realist Parcels and Flood Zones, geolocation detection, login process, splash screen, terms and conditions acceptance, loss of internet connectivity, device limits, and search by MLS Number with new mobile technology.
<b>Multiple Tickets</b>	Both Platforms	Refactored "My Agent" section in the consumer app with new mobile technology. This includes branding, suggestions, read statuses, and contact details from both agent and consumer perspectives.
<b>Multiple Tickets</b>	Both Platforms	Refactored push notification logic on both consumer and agent ends, encompassing new leads, suggestions, favorite contacts, and messages.
<b>MOB-3064</b>	Both Platforms	Rectified the price reduction percentage issue when the new price is unspecified.

<b>MOB-6172</b>	Both Platforms	Addressed an issue causing suboptimal server calls when opening listing details.
<b>MOB-5977</b>	Android	Resolved a glitch that hindered the appearance of the confirmation prompt when resetting the agent code in the consumer app.
<b>MOB-6053</b>	Android	Fixed a display issue with textbox-based searches in search filters.
<b>MOB-6644</b>	Android	Corrected the disclaimer display in certain scenarios on the consumer app.
<b>MOB-5913</b>	iOS	Adjusted the Median Price Calculation in Stats.
<b>MOB-5954</b>	iOS	Fixed a visual issue where the navigation bar briefly appeared when exiting the gallery view.
<b>MOB-6099</b>	iOS	Addressed a mismatch where Stats displayed results outside the designated map area.
<b>MOB-6558</b>	iOS	Resolved a control issue in the Matrix Integrations where disabling a switch would inadvertently disable others.
<b>MOB-6780</b>	iOS	Fixed a preference issue where the app didn't use its locale settings, defaulting to the phone's settings instead.
